waste of time. well what can i say one of the best driving games i have ever played and well worth the price.. I played the game and found it to be enjoyable. To me, a guy who is in the process of actually learning how to drive, playing this game gives me an insight of what driving can and cannot be like. Obviously this game, being an indie game, will have its flaws and bugs and errors etc. (I only experience a "space driving" glitch where I flew from one hill to another unhurt during the free ride.) But in the end, for \$5 USD it is a nice buy. If you are interested in a game that gives you a smooth, enjoyable, educative, and mildly hectic driving simulation, then "Safety Driving Simulator: Car" is the game for you. For a quick note to all future customers: I didn't run this game on my actual gaming PC: A Core2Quad Q6600 with Dual 9800GT's at 1024mb ddr3 total video memory, and 3GB DDR2 RAM. INSTEAD: I ran this game on my AIO Dell with 4GB DDR3 RAM, A Sandy Bridge Pentium G620T 2.2Ghz Dual Core Processor, and Intel HD Graphics. The game ran at 1600x900 at low setting with:

30FPS at the Worst

60FPS Most of the Time

Overall This game would get a B Rating from me.

84V100. This game lets you drive a car after doing 3 Joints,3 lines of Coke and taking 3 pills in Ibiza.

SO if you want a game to play that lets you do all 3 of the things above then this is for you.

JUST BUY IT ALREADY!!! Just as crappy as it looks. Best 3 minutes of my life.. This game is good for people learning to drive but the physics are not very realistic and the game kept on crashing my windoes 10 comuter. Would only recomend for users without windows 10 and when the game is on sale.. THIS GAME IS SO BAD!!!! Please don't waste your money on this\u2665\u2665\u2665\u2665\u2665because it will be the worst five dollars you have ever spent. Please, listen to my advice and spend that five dollars on a different game!!!. Do not buy. The cars don't move and you cannot steer. Other than that it's great though.
